The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

**Patent Notices**

SOLIDWORKS® 3D mechanical CAD software is protected by U.S. Patents 5,815,154; 6,219,049; 6,219,055; 6,611,725; 6,844,877; 6,898,560; 6,906,712; 7,079,990; 7,477,262; 7,558,705; 7,571,079; 7,590,497; 7,643,027; 7,672,822; 7,688,318; 7,694,238; 7,853,940; 8,305,376; 8,581,902, and foreign patents, (e.g., EP 1,116,190 B1 and JP 3,517,643).

**Trademarks and Product Names for SOLIDWORKS Products and Services**

SOLIDWORKS, 3D ContentCentral, 3D PartStream.NET, eDrawings, and the eDrawings logo are registered trademarks and FeatureManager is a jointly owned registered trademark of DS SolidWorks.

CircuitWorks, FloXpress, PhotoView 360, and TolAnalyst are trademarks of DS SolidWorks.

FeatureWorks is a registered trademark of Geometric Ltd.

Other brand or product names are trademarks or registered trademarks of their respective holders.

**COMMERCIAL COMPUTER SOFTWARE - PROPRIETARY**

The Software is a “commercial item” as that term is defined at 48 C.F.R. 2.101 (OCT 1995), consisting of “commercial computer software” and “commercial computer software documentation” as such terms are used in 48 C.F.R. 12.212 (SEPT 1995) and is provided to the U.S. Government (a) for acquisition by or on behalf of civilian agencies, consistent with the policy set forth in 48 C.F.R. 12.212; or (b) for acquisition by or on behalf of units of the Department of Defense, consistent with the policies set forth in 48 C.F.R. 227.7202-1 (JUN 1995) and 227.7202-4 (JUN 1995).

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/Manufacturer: Dassault Systèmes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

### Introduction

- About This Course ........................................... 2
- Prerequisites .................................................. 2
- Course Design Philosophy ................................. 2
- Using this Book .............................................. 2
- About the Training Files ................................. 3
- Conventions Used in this Book ....................... 3
- Windows® 7 .................................................. 3

### Lesson 1: Connecting to a Vault

- COM Programming ......................................... 6
- API Object Interfaces .................................... 6
- PDMWorks Enterprise Type Library .................. 6
- Application Types ........................................... 7
  - Case Study: Creating a VB.NET Stand Alone Application .......................... 8
- Namespaces .................................................. 10
  - Importing Namespace names .............................. 10
- The IEdmVault Interface ................................ 12
  - Stand-alone Programs .................................. 12
  - Add-in programs ....................................... 12
- Debugger feedback ...................................... 13
  - Data Tips ............................................... 13
  - Watch Windows ......................................... 13
  - Message Boxes ......................................... 13
  - Debug Output Window ................................ 13
- Case Study: List Vault Views ......................... 15

Lesson 3: Users and Groups
The IEdmUser Interface .................................................. 74
The IEdmUserGroup Interface ........................................... 74
The IEdmUserMgr Interface ............................................. 74
Case Study: User Traversal .............................................. 74
Case Study: Group Traversal ............................................ 75
Case Study: Group Member Traversal ................................. 76
Case Study: Using IEdmUser Properties to Search for Users ...... 78
Case Study: Adding New Users ......................................... 79
Exercise 3: Find Users .................................................... 85

Lesson 4: Card Variables, Versions and Revisions
Card Variables .......................................................... 90
IEdmEnumerator-Variable .............................................. 90
GetVar and SetVar ........................................................ 90
CloseFile ....................................................................... 90
File Versions .................................................................. 90
File Revisions .................................................................. 90
Case Study: Set Revisions ............................................... 92
The IEdmDictionary Interface ......................................... 98
Case Study: Dictionaries .................................................. 99
Exercise 4: Find Cards where a Variable is Used .................. 111
Exercise 5: Find Revisions that use a Component .................. 115

Lesson 5: Add-In Applications
SOLIDWORKS Enterprise PDM Add-Ins ............................... 120
The IEdmAddIn Interface ............................................... 120
Case Study: Creating an Add-In ....................................... 120
The Implements Statement .............................................. 123
Simple Implementation .................................................. 125
COM Registration ......................................................... 126
GetAddInInfo ............................................................... 127
Minimum Version Required ............................................. 128
Additional Add-In Information ......................................... 128
Installing an Add-In ....................................................... 130
Debugging a DLL .......................................................... 132
The IEdmVault Argument ............................................... 136
The IEdmCmdMgr Argument ........................................... 137
The IEdmAddIn5. OnCmd Method ................................... 138
Case Study: Changing Card Variable Values ......................... 141
EdmCmdData Members for EdmCmd_CardInput ..................... 143
Case Study: Generating Serial Numbers .............................. 147
EdmCmdData Members for EdmCmd_SerialNo ....................... 148
Exercise 6: State Change .................................................. 165
Lesson 6:
Task Add-In Applications

SOLIDWORKS Enterprise PDM Task Add-Ins. 170
Task Interfaces 173
Case Study: Simple Task Add-In. 174
Task Hooks 175
Case Study: Check Number of Days in State 184
The IEdmSearch Interface 190
The IEdmWorkflowMgr Interface 194
The IEdmWorkflow Interface 197
Exercise 7: Scheduled Tasks 205

Appendix A:
C# Examples

Connecting to a Vault Using C# 212
