The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

**Patent Notices**

SOLIDWORKS®, 3D mechanical CAD and/or Simulation software is protected by U.S. Patents 6,611,723; 6,844,877; 6,898,560; 6,906,712; 7,079,990; 7,477,262; 7,558,705; 7,571,079; 7,590,497; 7,643,027; 7,672,822; 7,688,318; 7,694,238; 7,853,940; 8,305,576; 8,581,902; 8,817,028; 8,910,078; 9,129,083; 9,153,072; 9,262,863; 9,465,894; 9,646,412; 9,870,436; 10,055,083; 10,073,600 and foreign patents, (e.g., EP 1,116,190 B1 and JP 3,517,643).

eDrawings® software is protected by U.S. Patent 7,184,044; U.S. Patent 7,502,027; and Canadian Patent 2,318,706.

U.S. and foreign patents pending.

**Trademarks and Product Names for SOLIDWORKS Products and Services:**

SOLIDWORKS, 3D ContentCentral, 3D PartStream.NET, eDrawings, and the eDrawings logo are registered trademarks and FeatureManager is a jointly owned registered trademark of DS SolidWorks.

CircuitWorks, FloXpress, PhotoView 360, and TolAnalyst are trademarks of DS SolidWorks. FeatureWorks is a registered trademark of HCL Technologies Ltd.

Other brand or product names are trademarks or registered trademarks of their respective holders.

**COMMERCIAL COMPUTER SOFTWARE - PROPRIETARY**

The Software is a "commercial item" as that term is defined at 48 C.F.R. 2.101 (OCT 1995), consisting of "commercial computer software" and "commercial software documentation" as such terms are used in 48 C.F.R. 12.212 (SEPT 1995) and is provided to the U.S. Government

(a) for acquisition by or on behalf of civilian agencies, consistent with the policy set forth in 48 C.F.R. 12.212; or (b) for acquisition by or on behalf of units of the Department of Defense, consistent with the policies set forth in 48 C.F.R. 227.7202-1 (JUN 1995) and 227.7202-4 (JUN 1995).

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Lesson 4: Symbols and Components

What is a component? ................................................................. 76
  Component Identification .................................................. 76
  Component Symbol Identification ....................................... 77
Stages in the Process ............................................................ 77
Symbol Component Association ............................................ 82
Exercise 4: Symbols and Components ..................................... 85

Lesson 5: Manufacturers Parts

What are Manufacturers Parts? ............................................... 90
  Circuits and Terminals ..................................................... 90
  Circuit Association .......................................................... 92
Stages in the Process ........................................................... 93
Finding Manufacturer Parts .................................................. 95
  Search Options .............................................................. 96
  Editing Parts .................................................................. 100
  Circuit Symbols ............................................................. 101
  Circuit Association .......................................................... 103
Electrical Assemblies ......................................................... 105
Exercise 5: Manufacturers Parts ............................................. 109

Lesson 6: Wires and Equipotentials

Equipotentials and Wires ....................................................... 114
  Wire Styles ..................................................................... 115
Stages in the Process ........................................................... 115
Wire Style Manager ............................................................. 116
  Numbering Group ........................................................... 117
Replacing Wires ................................................................. 119
  Replacement Range .......................................................... 119
Equipotential Numbering Results ......................................... 124
Wire Numbering Results ...................................................... 126
Using Nodal Indicators ........................................................ 130
Exercise 6: Wires and Equipotentials ..................................... 135
# Lesson 7: Cabling

- What is Cabling? ......................................................... 138
- Changes in the Wiring Diagram ................................. 138
- Stages in the Process .................................................. 138
- Cables ................................................................. 139
- Detailed Cabling ....................................................... 140
- Terminal Strip ......................................................... 143
- Pin to Pin Connections .............................................. 144
  - Wires ................................................................. 144
  - Terminals ........................................................ 144
  - Creating a New Cable ......................................... 147
  - Adding Terminals to the Strip .............................. 150
  - Terminals Editor ................................................. 151
- Copy and Paste ....................................................... 153
- Exercise 7: Cabling .................................................. 158

# Lesson 8: Symbol Creation

- Symbols and Standards ............................................. 162
  - Symbol Creation ................................................ 162
  - Stages in the Process ....................................... 163
- Symbols Manager ...................................................... 163
- Symbol Properties .................................................. 164
  - Circuits, Terminals, Types .................................. 167
    - Circuit Transmission ........................................ 167
    - Connection Point Insertion .............................. 169
- Multiple Attribute .................................................. 172
- Splitting Attribute Data ......................................... 173
- Add to Library ....................................................... 173
- Copy, Paste Symbol ................................................ 174
- Exercise 8: Symbol Creation ................................... 176

# Lesson 9: Macros

- What are Macros? .................................................... 180
  - Stages in the Process ....................................... 180
- Creating and Adding Macros ..................................... 181
  - Creating a New Group ........................................ 181
  - Project Macros .................................................. 181
  - Paste Special ..................................................... 185
- Exercise 9: Macros .................................................. 190
Lesson 10: Cross Referencing

What is Cross Referencing? ........................................... 192
Cross Reference List ................................................... 192
Cross Reference State Colors .................................. 192
Cross Reference Text Coding .................................... 192
Cross Reference Types .............................................. 192
Same Level Cross Referencing .................................. 194
Cross Reference Location Listing ............................. 195
Stages in the Process .................................................. 195
Exercise 10: Cross Referencing ................................. 205

Lesson 11: Managing Origin-Destination Arrows

What are Origin-Destination Arrows? .......................... 208
Stages in the Process .................................................. 208
Origin-Destination Arrows .......................................... 210
Interpreting the Arrow Text ...................................... 211
Exercise 11: Origin-Destination Arrows ....................... 218

Lesson 12: Dynamic Programmable Logic Control

What is a PLC? ........................................................ 220
Dynamic Insertion .................................................... 221
Stages in the Process ................................................ 221
Adding a New Scheme ............................................. 221
Adding a PLC Mark .................................................. 222
Inserting a PLC ......................................................... 224
  PLC Configuration .................................................. 225
  PLC Configuration Options .................................... 225
  Editing Wires ......................................................... 229
Editing a PLC .......................................................... 232
Exercise 12: Adding a PLC ........................................ 234

Lesson 13: Automated Programmable Logic Control

How are PLCs Automated? ........................................ 238
Stages in the Process ............................................... 238
PLC Mark, Part ......................................................... 239
  Manufacturer Data .................................................. 239
IO Manager .............................................................. 241
Exercise 13: Automated Programmable Logic Control .... 248
