All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

**Patent Notices**

SOLIDWORKS® 3D mechanical CAD and/or Simulation software is protected by U.S. Patents 6,611,725; 6,844,877; 6,898,560; 6,906,712; 7,079,990; 7,477,262; 7,558,705; 7,571,079; 7,590,497; 7,643,027; 7,672,822; 7,688,318; 7,694,238; 7,853,940; 8,305,376; 8,581,302; 8,817,028; 8,910,078; 9,129,083; 9,153,072; 9,262,863; 9,465,894; 9,646,412; 9,870,436; 10,035,493 and foreign patents, (e.g., EP 1,116,190 B1 and JP 3,517,643).

eDrawings® software is protected by U.S. Patent 7,184,044; U.S. Patent 7,502,027; and Canadian Patent 2,318,706.

U.S. and foreign patents pending.

** Trademarks and Product Names for SOLIDWORKS Products and Services**

SOLIDWORKS, 3D ContentCentral, 3D PartStream.NET, eDrawings, and the eDrawings logo are registered trademarks and FeatureManager is a jointly owned registered trademark of DS SolidWorks.

CircuitWorks, FloXpress, PhotoView 360, and TolAnalyst are trademarks of DS SolidWorks.

FeatureWorks is a registered trademark of HCL Technologies Ltd.

Other brand or product names are trademarks or registered trademarks of their respective holders.

**COMMERCIAL COMPUTER SOFTWARE - PROPRIETARY**

The Software is a “commercial item” as that term is defined at 48 C.F.R. 2.101 (OCT 1995), consisting of “commercial computer software” and “commercial software documentation” as such terms are used in 48 C.F.R. 12.212 (SEPT 1995) and is provided to the U.S. Government (a) for acquisition by or on behalf of civilian agencies, consistent with the policy set forth in 48 C.F.R. 12.212; or (b) for acquisition by or on behalf of units of the Department of Defense, consistent with the policies set forth in 48 C.F.R. 227.7202-1 (JUN 1995) and 227.7202-4 (JUN 1995).

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Introduction

About This Course .................................................. 2
Prerequisites ......................................................... 2
Course Design Philosophy ......................................... 2
Case Studies .......................................................... 2
Exercises .............................................................. 2
A Note About Dimensions ........................................ 3
Conventions Used in this Book ................................. 3
About the Training Files ........................................... 3
Training Templates .................................................. 4
Accessing Training Templates in SOLIDWORKS ............ 4
Windows OS ........................................................... 5
Use of Color .......................................................... 5
Color Schemes ........................................................ 5
RealView Graphics .................................................. 5
More SOLIDWORKS Training Resources ..................... 6
Local User Groups .................................................... 6

Lesson 1

Multibody Design Techniques

Multibody Parts ..................................................... 8
Hide/Show Tree Items ............................................... 8
Multibody Design Techniques ................................. 8
Creating a Multibody .............................................. 10
Merge Result ........................................................ 10
Case Study: Multibody Design .................................. 10
Contour Selection .................................................... 11
Lesson 2
Saving Solid Bodies

Multibody Part vs. Assembly ........................................ 60
Saving Bodies Functions ........................................ 61
    Default Templates ........................................ 62
Case Study: Clamp ........................................ 62
Insert into New Part ........................................ 63
Save Bodies .................................................. 67
Case Study: Boat Cleat ........................................ 67
Modeling for Rapid Tooling .................................. 70
Splitting a Part into Multiple Bodies ..................... 71
    Split Feature ........................................ 71
Case Study: Handle ........................................ 72
    Saving Split Bodies .................................. 73
Automating an Assembly .................................... 74
Case Study: Using Split Part with Legacy Data ........ 75
Exercise 8: Insert into New Part ........................... 78
Exercise 9: Split Part and Save Bodies ................... 80
Exercise 10: Modeling for Rapid Tooling ................. 83
Lesson 3
Sketching with Splines

Curves in Sketches .................................................. 98
Using Sketch Pictures ............................................. 100
Case Study: Guitar Body .......................................... 101
Splines ................................................................. 103
  Standard Spline .................................................. 104
  Keep it Simple ...................................................... 104
  Creating and Manipulating Splines .................. 104
  Anatomy of a Spline ............................................. 107
  Spline Tools ......................................................... 107
Adding Spline Relations ........................................... 107
  Spline Handle Basics ............................................ 107
  Spline Handle Relations ......................................... 108
Changing the Shape of a Spline .................................. 109
  The Control Polygon ............................................. 109
  Manipulating the Spline Handles ....................... 109
Fully Defining Splines ............................................. 111
Evaluating Splines .................................................. 111
  Spline Evaluation Tools .......................................... 112
  What is Curvature? ................................................. 112
  Evaluating Curve Quality using Curvature Combs .... 113
  Spline Parameters ................................................ 115
  Other Spline Modification Tools ......................... 116
Case Study: Two Point Spline ................................... 118
  Equal Curvature and Torsion Continuity ................ 118
  Evaluating Continuity with Curvature Combs ......... 120
Analyzing Solid Geometry ....................................... 121
  Display Curvature ............................................... 121
  Zebra Stripes ...................................................... 122
  Surface Curvature Combs ....................................... 123
Case Study: Torsion Continuity ................................ 124
Style Spline .......................................................... 126
Case Study: Watering Can Handle ............................. 126
  Style Spline Types ............................................... 127
  Style Spline Tools ............................................... 129
Fit Spline ............................................................ 132
Case Study: Coffee Cup .......................................... 132
  Fit Spline Parameters ........................................... 134
  Fit Spline Tolerance .............................................. 134
  Splines Summary .................................................. 136
Exercise 11: Fleur-de-lis .......................................... 137
Exercise 12: Soda Bottle .......................................... 144
Exercise 13: Spline Practice .................................... 148
Exercise 14: Coffee Cup Handle ............................... 150
Exercise 15: Fun with Splines .................................. 154
### Lesson 4
#### Introduction to Sweeping

Sweeping .......................................................... 158
Sweep Requirements ............................................. 159
Case Study: Faux Raised Panel Door ....................... 160
Sweep with Guide Curves ....................................... 162
Case Study: Bottle Body ....................................... 162
  Pierce Relation .................................................. 164
  Showing Intermediate Sections ............................ 167
  Multi-thickness Shell ....................................... 168
The SelectionManager ........................................... 169
Case Study: Hanger Bracket ................................... 170
Exercise 16: Oval Foot Drawer Pull .......................... 173
  Symmetrical Splines ............................................ 175
Exercise 17: Tire Iron .............................................. 178
  Circular Profile Sweep ....................................... 179
  Dome Feature .................................................. 180
Exercise 18: Starship Fuselage ................................. 182
Exercise 19: Build Your Own Bottle ......................... 187

### Lesson 5
#### 3D Sketching and Curve Features

Curve Features .................................................... 190
Case Study: Spring ............................................... 191
Sweeping Along a 3D Path ...................................... 191
3D Sketching ...................................................... 191
  Using Reference Planes ..................................... 191
  Additional Techniques ....................................... 191
  Space Handle .................................................. 192
  Subset of Sketch Entities and Relations .................. 192
Helix Curve ......................................................... 197
  Helix and Spiral Feature ..................................... 197
Creating a 3D Curve from Orthogonal Views .............. 200
Projected Curve Feature ........................................ 201
Combining Curves ................................................ 202
  Composite Curve Feature .................................... 202
Smoothing Transitions .......................................... 204
Exercise 20: 3D Sketching ...................................... 206
Exercise 21: 3D Sketching with Planes ...................... 209
  Activating a Plane ............................................ 213
  Creating a Plane within a 3D Sketch ...................... 215
Exercise 22: D-cell Flashlight Spring ....................... 218
Exercise 23: Water Bottle Cage ................................ 219
### Lesson 6
#### Threads and Library Feature Parts

Lesson 9
Advanced Loft and Boundary Features

- Additional Curves in Loft and Boundary ............................................. 362
- Centerline Lofting ............................................................................. 362
- Case Study: Heat Shield ................................................................. 362
  - Sharing Sketches ......................................................................... 364
- Loft Preview Options ....................................................................... 365
- Adding Sketch Segments ................................................................. 367
  - Segment ....................................................................................... 367
  - Split Entities ............................................................................... 367
- Cleaning Up a Model ....................................................................... 369
- Deleting Faces ................................................................................ 370
  - Delete Face Feature .................................................................... 370
- Evaluating Edges ............................................................................ 371
  - Deviation Analysis ...................................................................... 371
- Face Fillets ...................................................................................... 372
- Case Study: Hook ........................................................................... 376
  - Planning a Modeling Strategy ...................................................... 377
- Curve Influence ................................................................................ 382
- Exercise 36: Hook Continued ......................................................... 385
- Exercise 37: Funnel ......................................................................... 390
- Conics .............................................................................................. 390
- Exercise 38: Rocker Arm ................................................................. 400

Lesson 10
Advanced Filleting and Other Features

- Fillet Settings .................................................................................... 406
- Fillet Parameters .............................................................................. 407
  - Fillet Method ............................................................................... 407
  - Fillet Profile .................................................................................. 408
- Constant Size Fillets ....................................................................... 409
  - Multiple Radius ............................................................................ 409
  - Setback Parameters ..................................................................... 410
- Delete Face: Delete and Fill ............................................................ 412
- Partial Edge Parameters .................................................................. 413
- Fillet Options ................................................................................... 413
  - Select Through Faces .................................................................. 413
  - Keep Features ............................................................................... 414
  - Round Corners ............................................................................. 416
  - Overflow Options ......................................................................... 416
