

SOLIDWORKS®

Surface Modeling

Dassault Systèmes SolidWorks Corporation
175 Wyman Street
Waltham, MA 02451 U.S.A.

© 1995-2024, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Introduction

About This Course	2
Prerequisites	2
Using this Book	2
A Note About Dimensions	3
About the Training Files.....	3
Training Templates.....	3
Accessing Training Templates in SOLIDWORKS	4
Conventions Used in this Book	5
Windows OS.....	5
Use of Color	5
Accessing Commands.....	6
More SOLIDWORKS Training Resources.....	6
Local User Groups	6

Lesson 1
Understanding Surfaces

Solids and Surfaces 8
 Geometry vs. Topology 8
 What is a Solid? 10
 Euler’s Formula 10
 Behind the Scenes 10
 Adjusting FeatureManager Settings 10
 Introducing: Extruded Surface 11
 Introducing: Planar Surface 13
 Introducing: Trim Surface 14
 Introducing: Untrim Surface 15
 Face Curves and Mesh Preview 16
 Introducing: Face Curves 16
 Surface Types 17
 Four-Sided Surfaces 18
 Introducing: Knit Surface 19
 Creating Solids from Surfaces 20
 Introducing: Create Solid 20
 Introducing: Thicken 20
 Summary 21
 Decomposing a Solid into Surfaces 21
 Introducing: Delete Face 21
 Additional Surface Concepts 23
 Boolean Operations 23
 Edges vs. Holes 23
 Take Aways 24
 Why Use Surfaces? 24
 When Not to Use Surfaces 25
 Hybrid Modeling 25
 Continuity Explained 26
 Workflow with Surfaces 27
 Working with Images 27
 Layout Sketch 28
 Identify Symmetry and Edges 29
 Identify Functional Faces 30
 Check your Models Frequently 30
 Check Entity 31
 Understanding Rebuild Options 31
 Introducing: Verification on Rebuild 31
 Folders in the FeatureManager Design Tree 32
 Clean-up 32
 Exercise 1: Trimming Surfaces 33
 Exercise 2: Trimming and Knitting 36
 Introducing: Curve Through Reference Points 37

Lesson 2**Introduction to Surfacing**

Similarities Between Solid and Surface Modeling	40
Basic Surfacing	40
Introducing: Revolved Surface	42
Introducing: Swept Surface	42
Filleting Surfaces	45
Cutting the Bottom	46
Introducing: Radiate Surface	47
Introducing: Cut with Surface	48
Sharing a Model	49
Alternative to Trim	50
Introducing: Intersect	50
Solid from Imported Surfaces	50
Changing a Solid With a Surface	52
Recreating a Molded Part	53
Exercise 3: Basic Surface Modeling	55
Introducing: Extend Surface	56
Exercise 4: Halyard Guide	60
Exercise 5: Finial Scroll	65
Ruled Surface	67
Exercise 6: Using Intersect	72
Exercise 7: Camera Body	74

Lesson 3**Solid-Surface Hybrid Modeling**

Hybrid Modeling	78
Using Surfaces to Modify Solids	79
Display	80
Introducing: Replace Face	82
Interchanging Between Solids and Surfaces	84
Performance Implications	85
What Contributes to Rebuild Time?	87
Surfaces as Construction Geometry	88
Stages in the Process	88
Intersection Curve Feature	92
Making Copies of Faces	94
Introducing: Offset Surface	94
Repairing Countersunk Hole Problem	94
Flattening Surfaces	97
Introducing: Surface Flatten	97
Exercise 8: Lofting Between Surfaces	99
Exercise 9: Finial Wrap	101
Exercise 10: Flatten Surface	106

Lesson 4

Repairing and Editing Imported Geometry

- Importing Data 110
 - Modeling Kernels 110
 - Contents of a CAD File 110
 - File Formats 111
 - Format Recommendations 112
- File Translation 112
- Why Do Imports Fail? 113
- SOLIDWORKS Import Options. 113
 - 3D Interconnect for Native File Formats 113
 - 3D Interconnect for Neutral File Formats. 114
- Importing a STEP File 115
 - Introducing: Import Diagnostics. 116
 - Addressing Errors in 3D Interconnect Imports. 117
 - Another Option 118
- Addressing Translation Errors 119
- Repairing and Editing Imported Geometry 120
 - Introducing: Check Entity. 120
 - Introducing: Display Curvature 122
 - Patching Strategies 123
 - Introducing: Filled Surface 123
 - Another Strategy 125
- Procedure for Rebuilding Fillets. 126
 - Extend Surface 127
 - Editing Imported Parts 130
 - Delete Hole 132
- Exercise 11: Import Diagnosis 134
- Exercise 12: Using Import Surface and Replace Face 137
- Exercise 13: Repairing Imported Geometry 140

Lesson 5

Blends and Patches

- Smoothing Patches 146
 - Three Alternative Approaches 146
- Boundary Surface 149
 - Introducing: Boundary Surface. 149
- Corner Blends 153
 - Stages in the Process. 153
 - Alternative Approach 156
 - Spline on Surface 158
 - Introducing: Spline on Surface 158
- Exercise 14: Bathtub Fillet 162
- Exercise 15: Corner Blend 165

Lesson 6 Complex Blends

Complex Blends	170
Stages in the Process.	171
Splitting Trim Boundaries	174
The Cumulative Effect of Tolerances.	178
Hide/Show Bodies	178
Introducing: Hide/Show Bodies	178
Using the Tab Key	178
Trimming the Bottom Bracket	180
Freeform Feature.	182
Introducing: Freeform.	182
Mesh Orientation	184
Using the Triad	187
Moving Control Points	188
Undoing Changes	189
Boundary Conditions	189
Exercise 16: Bicycle Frame	193
Exercise 17: Patches	200

Lesson 7 Advanced Surface Modeling

Stages in the Process.	208
Using Sketch Pictures	209
Creating the Parting Surface.	212
Construction Surfaces.	215
Lofted Surface.	215
Adding a Loft Section.	220
An Alternative Approach	222
Modeling the Lower Half	224
Introducing: Partial Ellipse	226
Preparation for Using Filled Surface	228
Completing the Solid Model.	230
Design Changes	232
Dynamic Feature Editing	232
Introducing: Instant3D	233
Replacing the Planar Face.	234
Creating a Flat Surface	236
Exercise 18: Mouse Model	238
Exercise 19: Bar of Soap	248
Exercise 20: Handle	256

Lesson 8

Master Model Techniques

- Introduction to Master Models 266
 - Transmitting Curve Data 267
 - Push and Pull type Operations 267
 - Naming Bodies 268
 - Specifying the Configuration of the Parent 269
 - Split Feature 269
 - Summary of Recommendations 269
- Surface Master Model Technique 270
 - Propagating Changes 271
- Working with a Solid Master Model. 277
 - Splitting the Part 277
 - Modeling the Keypad 279
- Specialized Features for Plastic Parts 285
 - Introducing: Fastening Features 285
 - Mounting Boss 286
 - Reveal 292
 - Introducing: Draft Analysis 296
 - Snap Hook and Groove. 298
 - Favorites 299
 - Saving the Bodies and Creating an Assembly 302
- Exercise 21: Solid Master Model 303
