SOLIDWORKS Simulation

Dassault Systèmes SolidWorks Corporation
175 Wyman Street
Waltham, MA 02451 U.S.A.

© 1995-2022, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes SE company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Contents

Introduction

About This Course	2
Prerequisites	2
Course Design Philosophy	2
Using this Book	2
Laboratory Exercises	3
About the Training Files.....	3
Windows®	3
Conventions Used in this Book	3
Use of Color	4
Color Schemes	4
More SOLIDWORKS Training Resources.....	5
Local User Groups	5
What is SOLIDWORKS Simulation?.....	6
What Is Finite Element Analysis?.....	7
Build Mathematical Model.....	8
Defeaturing	9
Idealization	9
Clean-up	9
Build Finite Element Model	10
Solve Finite Element Model	10
Analyze Results	10
Errors in FEA	10

- Finite Elements 11
 - Element Types Available in SOLIDWORKS Simulation 11
 - First Order Solid Tetrahedral Elements 12
 - Second Order Solid Tetrahedral Elements 13
 - First Order Triangular Shell Elements 14
 - Second Order Triangular Shell Elements 15
 - Beam Elements 15
 - Choosing Between Solid and Shell Elements. 16
 - Draft vs. High Solid and Shell Elements 16
- Degrees of Freedom 17
- Calculations in FEA 17
- Interpretation of FEA Results 18
 - Principal Stresses: P1, P2, and P3. 19
- Units of Measurement. 20
- Limitations of SOLIDWORKS Simulation 20
 - Linear Material 21
 - Small Structural Deformations 21
 - Static Loads. 22
- Summary. 22

**Lesson 1:
The Analysis Process**

- Objectives 23
- The Analysis Process 24
 - Stages in the Process. 24
- Case Study: Stress in a Plate. 24
 - Project Description 25
 - SOLIDWORKS Simulation Interface 26
- SOLIDWORKS Simulation Options 28
 - Plot Settings 30
- Preprocessing 31
 - New Study. 32
 - Assigning Material Properties 33
 - Fixtures 35
 - Fixture Types 35
 - External Loads 38
 - Size and Color of Symbols 41
 - Preprocessing Summary 42
- Meshing 43
 - Standard Mesh 43
 - Curvature-Based Mesh 43
 - Blended Curvature-Based Mesh. 43
 - Mesh Density 44
 - Element Sizes 44
 - Minimum Number of Elements in a Circle 44
 - Ratio 45
 - Mesh Quality. 46

Processing	48
Postprocessing	48
Result Plots	48
Modifying Result Plots	49
Nodal vs. Element Stresses	50
Show as Tensor Plot Option	51
Average stresses at mid-nodes	52
Managing Result Plots	56
Additional Plot Controls	56
Other Plots	60
Multiple Studies	63
Creating New Studies	63
Copy Parameters	63
Check Convergence and Accuracy	66
Results Summary	66
Comparison with Analytical Results	68
Reports	69
Summary	71
References	71
Questions	71
Exercise 1: Bracket	72
Exercise 2: Compressive Spring Stiffness	81
Problem Statement	81
Exercise 3: Container Handle	84

Lesson 2:

Mesh Controls, Stress Concentrations and Boundary Conditions

Objectives	85
Mesh Control	86
Case Study: The L Bracket	86
Project Description	86
Stages in the Process	86
Run This Study	89
Analysis with Local Mesh Refinement	90
Mesh Controls	91
Results	96
Results Comparison	96
Stress Singularities	97
Suppressed Configuration	100
Case Study: Analysis of Bracket with a Fillet	100
Result Force	105
Case Study: Analysis of a Welded Bracket	107
Understanding the Effect of Boundary Conditions	108
Conclusion	109

Summary	109
Questions	109
Exercise 4: C-bracket	110
Exercise 5: Bone Wrench	120

Lesson 3:**Assembly Analysis with Interactions**

Objectives	125
Interaction Analysis	126
Case Study: Pliers with Global Interaction.	126
Project Description	126
Stages in the Process.	126
Component Interaction	128
Component Interaction: Options.	128
Component Interactions: Default Setting	129
Component Contact: Hierarchy and Conflicts	129
Study Properties	131
Viewing Assembly Results.	134
Strong Enough?.	135
Contact or Bonded Interaction	136
Pliers with Local Interaction.	137
Local Interaction.	137
Local Interaction Types	138
Self-Contact	139
Required Force	139
Local Interaction Contact Properties	141
Contact Formulation	142
Contact Stresses	144
Summary	145
Questions	146
Exercise 6: Two Ring Assembly	147

Lesson 4:**Symmetrical and Free Self-Equilibrating Assemblies**

Objectives	151
Shrink Fit Parts	152
Case Study: Shrink Fit	152
Project Description	152
Symmetry	152
Stages in the Process.	152
Defeaturing	153
Rigid Body Mode	154
Underconstrained Bodies	155
Shrink Fit Contact Condition	156
Plot Results in Local Coordinate System	159
Cylindrical Coordinate Systems	159
Saving All Plots	163
What's Wrong Feature	163

Analysis with Soft Springs	164
Soft Springs.	164
Inertial Relief	165
Collapse Tree Item	165
Summary.	167
Exercise 7: Bone Wrench Assembly	168

Lesson 5:

Assembly Analysis with Connectors and Mesh Refinement

Objectives	173
Case Study: Cardan Joint	174
Problem Statement	174
Remote Load/Mass	175
Load Location.	176
Reference Coordinate System.	176
Types of Loads	176
Connection Type.	176
Connectors	178
Connector Types.	178
Automatic Conversion of Toolbox Fasteners to Bolts	180
Distributed Coupling.	181
Bolt Strength Data	182
Bolt Pre-load.	182
Bolt Tight fit and Diameter.	183
Interaction Viewer	185
Automatically Find Local Interactions	186
Local Interaction Contact Properties	188
Pin Connectors	190
Rotational and Axial Stiffness	191
Virtual Wall, Axial and Tangential Stiffness	193
Mesh Control in an Assembly.	194
Required Number of Solid Elements in Thin Features.	194
Pin/Bolt Force.	198
Mesh Plots.	200
Quality Plot.	200
Factor of Safety Plot.	204
Summary.	208
Exercise 8: Chain Link	209
Exercise 9: Lift Assembly.	226
Exercise 10: Analysis with Base (optional)	235
Exercise 11: Spot Welds-Solid Mesh	236
Interaction Between Parts.	240
Exercise 12: Bolt Connectors	244
Exercise 13: Wood Splitter.	248

Lesson 6:**Bonded Mesh Options**

Objectives	255
Bonded Mesh Options	256
Case Study: Rotor	256
Project Description	256
Centrifugal Force	256
Cyclical Symmetry	258
Bonding Options	260
Gap Range	260
Common Nodes	260
Automatic Switch	261
Bonding Formulation	261
Node to Surface	261
Surface to Surface	262
Summary	267
Exercise 14: Vise Grip Pliers	268
Spring Connector Types	273
Spring Connector Options	273

Lesson 7:**Analysis of Thin Components**

Objectives	281
Thin Components	282
Case Study: Pulley	282
Project Description	283
Part 1: Mesh with Solid Elements	283
Symmetry Fixtures	284
Part 2: Refined Solid Mesh	287
Solid vs. Shell	289
Creating Shell Elements	290
Part 3: Shell Elements - Mid-plane Surface	290
Thin vs. Thick Shells	292
Shell Mesh Colors	294
Changing Mesh Orientation	294
Shell Element Alignment	296
Render shell thickness in 3D	297
Applying Symmetry Restraints	299

Results Comparison	303
Computational Effort	303
Case Study: Joist Hanger	304
Project Description	304
Summary	310
Questions	311
Exercise 15: Bracket	312
Exercise 16: Shell Mesh Using Outer/Inner Faces	318
Exercise 17: Edge Weld Connector	322
Exercise 18: Container Handle Weld	330

Lesson 8:**Mixed Meshing Shells & Solids**

Objectives	331
Mixed Meshing Solids and Shells	332
Bonding Shells and Solids	333
Mixed Mesh: Supported Analysis Types	333
Case Study: Pressure Vessel	333
Project Description	334
Analyze the Assembly	334
Preparing the Model	336
Material	338
Steel Identification Systems	338
UNS Index	338
Other Indices	339
Bulk and Shear Moduli	340
Shell to Shell Bonding	341
Shell to Solid Bonded	342
Failure Diagnostics	344
Meshing Small Features	344
Incremental Meshing	346
Summary	351
Questions	351
Exercise 19: Mixed Mesh Analysis	352
Simulation Evaluator	356
Summary	357

Lesson 9:**Beam Elements- Analysis of a Conveyor Frame**

Objectives	359
Project Description	360
Element Choices	360
Beam Elements	360
Truss Elements	360
Stages in the Process.	360
Slenderness Ratio	362
Section Properties	362
Connected and Disconnected Joints	363
Sphere Diameter Defining Beam Joint	364
Beam Joints: Locations.	364
Beam Joint Types	364
Render Beam Profile.	367
Beam Stress Components	368
Cross-section 1st and 2nd Directions	368
Bending Moment and Shear Force Diagrams.	371
Summary.	375
Questions	375

Lesson 10:**Mixed Meshing Solids, Beams & Shells**

Objectives	377
Mixed Meshing.	378
Case Study: Particle Separator	378
Project Description	378
Stages in the Process.	378
Beam Mesh	381
Beam Imprint	387
Summary.	389
Exercise 20: Cabinet.	390
Exercise 21: Frame Rigidity	399

Lesson 11:**Design Study**

Objectives	401
Design Study.	402
Case Study: Suspension Design	402
Project Description	402
Stages in the Process.	402
Part 1: Multiple Load Cases	402
Design Studies	404
Parameters.	404
Design Study Results	410
Design Study Options.	411

Part 2: Geometry Modification	413
Design Study Graph	416
Summary	417
Exercise 22: Design Study	418
Lesson 12:	
Thermal Stress Analysis	
Objectives	425
Thermal Stress Analysis	426
Case Study: Bimetallic Strip	426
Project Description	426
Material Properties	427
Importing Temperature and Pressure	432
Saving Model in its Deformed Shape	439
Summary	440
Lesson 13:	
Adaptive Meshing	
Objectives	441
Adaptive Meshing	442
Case Study: Support Bracket	442
Project Description	442
Geometry Preparation	443
h-Adaptivity Study	446
h-Adaptivity Options	447
h-Adaptive Plots	450
Convergence Graph	450
Review h-adaptive Solution	451
Strain Energy Error is NOT Stress Error	452
p-Adaptivity Study	453
p-Adaptive Solution Method	453
h vs. p Elements	455
Method Comparison	457
h vs. p Elements - Summary	458
Which Solution Method is Better?	459
Summary	459
Lesson 14:	
Large Displacement Analysis	
Objectives	461
Small vs. Large Displacement Analysis	462
Case Study: Clamp	463
Project Description	463
Part 1: Small Displacement Linear Analysis	463
Results Discussion	465
Contact in Small and Large Displacement Analyses	465

Part 2: Large Displacement Nonlinear Analysis 466
 Permanent Deformation 468
 SOLIDWORKS Simulation Premium 468
 Summary 469
 Questions 469

Appendix A:

Meshing, Solvers, and Tips & Tricks

Meshing Strategies 472
 Geometry Preparation 472
 Defeaturing 473
 Idealization 474
 Clean-up 474
 Mesh Quality 475
 Aspect Ratio Check 475
 Jacobian Check 476
 Mesh Controls 478
 Automatic Trials for Solids 480
 Meshing Stages 480
 Failure Diagnostics 481
 Tips for Meshing Parts 482
 Tips for Meshing Assemblies 482
 Tips for Using Shell Elements 483
 Hardware Considerations in Meshing 484
 Solvers in SOLIDWORKS Simulation 484
 Choosing a Solver 486
 Direct Sparse 486
 FFEPlus 487
 Large Problem Direct Sparse 487
 Intel Direct Sparse 487
 Email Notification Settings 488

Appendix B:
