Waltham, Massachusetts 02451 USA

© 1995-2022, Dassault Systèmes SolidWorks Corporation, a Dassault Systèmes SE company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systèmes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systèmes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Introduction

About This Course	2
Prerequisites	2
Course Length.....	2
Course Design Philosophy	2
Using this Book	2
Laboratory Exercises	2
About the Training Files.....	3
Windows.....	3
User Interface Appearance	3
Conventions Used in this Book	3
Use of Color	4
What is SOLIDWORKS Simulation?.....	4
Premium: Nonlinear	5
More SOLIDWORKS Training Resources.....	5
Local User Groups	5

Introduction to Nonlinear Structural Analysis

Introduction.....	8
Types of Nonlinearities.....	9
Geometric Nonlinearities	10
Material Nonlinearities	11
Solving Nonlinear Problems.....	12

Geometric Nonlinear Analysis

Introduction.....	14
Small Displacement Analysis.....	14
Large Displacement Analysis.....	15
Finite Strain Analysis.....	16
Large Deflection Analysis.....	17
References.....	18

Material Models and Constitutive Relations

Introduction.....	20
Elastic Models.....	20
Linear Elastic Model	20
Nonlinear Elastic Model.....	21
Hyper-elastic Models	22
Elasto-Plastic Models	27
Basic Characteristics.....	27
Essential Concepts of Elasto-plasticity.....	28
Elasto-Plastic Models	31
Super Elastic Nitinol Model	35
Flow Rule	37
Linear Visco-Elastic Model	38
Creep Model	41
References.....	43

Interaction Analysis

Introduction.....	46
Component Interaction/ Gap Conditions	46
Local Interaction/ Gap Conditions	46
Troubleshooting for Gap / Interaction Problems	48
References.....	50

Numerical Procedures for Nonlinear FEA

Overview.....	52
Incremental Control Techniques.....	52
Force Control Method.....	52
Displacement Control Method	53
Arc-length Control Method	53
Iterative Methods	54
Newton-Raphson (NR)	55
Modified Newton-Raphson (MNR)	56
Termination Criteria	57
References.....	57

**Lesson 1:
Large Displacement Analysis**

Objective	59
Case Study: Hose Clamp	60
Problem Statement	60
Stages in the Process.....	60
Linear Static Analysis.....	60
Auxiliary Boundary Conditions	62
Solvers	64
Geometrically Linear Analysis: Limitations.....	66
Nonlinear Static Study	66
Time Curves (Load Functions).....	67
Fixed Incrementation	68
Large Displacement Option: Nonlinear Analysis.....	69
Analysis Failure: Large Load Step	70
Fixed Time Incrementation Disadvantages	72
Autostepping.....	72
Autostepping Incrementation	72
Autostepping Parameters and Options	72
Advanced Options: Step/Tolerance Options.....	73
Linear Static Study (Large Displacement)	74
Summary	76
Questions	77

**Lesson 2:
Incremental Control Techniques**

Objective	79
Incremental Control Techniques.....	80
Force Control	80
Displacement Control	80
Case Study: Trampoline	81
Project Description	81
Stages in the Process.....	81
Linear Analysis	82
Membrane Structures	86
Nonlinear Analysis - Force Control	87
Initial Instability of Thin Flat Membranes	89
Releasing Prescribed Displacement	89
Restart Function	91
Analysis Progress Dialog Box	92
Analytical Results for Membranes	93
Nonlinear Analysis - Displacement Control	94
Displacement Control Method: Displacement Restraints.....	94
Single Degree of Freedom Control Limitation.....	96
Loading Mode in Displacement Control Method.....	96
Summary	100
Questions	100

Lesson 3:**Nonlinear Static Buckling Analysis**

Objective	101
Case Study: Cylindrical Shell	102
Problem Statement	102
Stages in the Process	102
Linear Buckling	102
Linear Buckling: Assumptions and Limitations	106
Linear Static Study	106
Nonlinear Symmetrical Buckling	107
Arc Length Control Method	107
Arc Length: Parameters	109
Discussion	114
Symmetrical vs. Asymmetrical Equilibrium, Bifurcation Point	115
Nonlinear Asymmetrical Buckling	115
Summary	119
Questions	119
Exercise 1: Nonlinear Analysis of a Shelf	120
Problem Statement	120
Linear Buckling Analysis	122
Nonlinear Buckling Analysis	123
Discussion	127
Summary	127
Exercise 2: Nonlinear Analysis of Remote Control Button	128
Problem Statement	128
Summary	132

Lesson 4:**Plastic Deformation**

Objective	133
Plastic Deformation	134
Case Study: Paper Clip	134
Problem Statement	135
Stages in the Process	135
Linear Elastic	135
Nonlinear Study with Linear Material	138
Nonlinear - von Mises	140
Nonlinear - Tresca's	143
Discussion	146
Stress Accuracy (Optional)	146
Mesh Sectioning	148
Summary	150
Questions	150

Exercise 3: Stress Analysis of a Beam Using Nonlinear Elastic Material	151
Problem Statement	151
Summary	154
Exercise 4: Oil Well Pipe Connection	155
Problem Description	155
Materials	157
Loading Conditions	157
Goal	157

Lesson 5: Hardening Rules

Objective	159
Hardening Rules	160
Case Study: Crank Arm	160
Problem Statement	160
Stages in the Process	160
Isotropic Hardening	160
Discussion	165
Kinematic Hardening	165
Discussion	166
Summary	166
Questions	167

Lesson 6: Analysis of Elastomers

Objective	169
Case Study: Rubber Pipe	170
Problem Statement	170
Stages in the Process	170
Two Constant Mooney-Rivlin (1 Material Curve)	171
Discussion	176
Coefficient of Determination	177
2 Constant Mooney-Rivlin (2 Material Curves)	177
2 Constant Mooney-Rivlin (3 Material Curves)	179
6 Constant Mooney-Rivlin (3 Material Curves)	181
Summary	184
Questions	184
Exercise 5: Analysis of a Seal	185
Problem Statement	185
Summary	187

Lesson 7: Nonlinear Interaction Analysis

Objective	189
Case Study: Rubber Tube	190
Problem Statement	190

Connections	193
Interactions	193
Connectors	193
Contact Instabilities	196
Stabilization	196
Explore and Compare Stabilizing Solutions.....	198
Dynamic Solution.....	200
Summary.....	203
Questions	203
Exercise 6: Seal Assembly	204
Problem Description	204
Exercise 7: Container Seal	207
Problem Description.....	207
Exercise 8: Gear Assembly.....	212
Problem Description.....	212
Materials	212
Loading Conditions.....	212
Goal.....	212

Lesson 8: Metal Forming

Objective.....	213
Bending.....	214
Case Study: Sheet Bending.....	214
Problem Statement	214
Stages in the Process.....	215
Plane Strain.....	216
Large Strain Formulation Option	222
Convergence Problems	223
Automatic Stepping Problems	223
Discussion.....	228
Small Strain Vs. Large Strain Formulations.....	230
Summary.....	232
Questions	233
Exercise 9: Large Strain Contact Simulation - Flanging	234
Problem Description	234
Materials	234
Loading Conditions.....	234
Goal.....	234

Appendix A: True and Engineering Stress and Strain

Engineering Stress and Strain.....	236
True Stress and Strain	236
References.....	238
