© 1995-2023, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes SE company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(l)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

What is SOLIDWORKS Simulation?. 6

Lesson 1: Vibration of a Pipe

Objectives 7
Problem Description 8
Static Analysis. 8
Frequency Analysis. 11
Discussion 13
Dynamic Analysis (Slow Force) 13
Linear Dynamic Analysis 13
Discussion 19
Dynamic Analysis (Fast Force). 20
Summary 22
Questions 22
Exercise 1: Vibration of Cantilever Beam 23

Lesson 2: Transient Shock Analysis According to MILS-STD-810H

Objectives 29
Problem Description 30
Run Frequency 34
Mass Participation Factor 35
Mass Participation in Shells 37
Frequency Discussion 39
Damping 41
Viscous Damping 42
Time Step 46
Summary 54
Questions 54
Exercise 2: Remote Mass Electronics Enclosure 55
Summary 60
Exercise 3: Transient Analysis of Alternator Bracket 61
Maximum Number of Time Increments 68
Summary 70
Exercise 4: Remote Mass 71
Summary 76

Lesson 3:
Harmonic Analysis of a Bracket

Objectives 77
Project Description 78
Harmonic Analysis Basics 78
Single DOF Oscillator 79
Harmonic Analysis of a Bracket 80
Phase Angle 81
Harmonic Study Properties 84
Summary 89
Questions 89
Exercise 5: Harmonic Analysis of Alternator Bracket 90
Summary 95
Exercise 6: Phase Angle Effects 96
Predicting Results 99
Summary 101

Lesson 4:
Response Spectrum Analysis

Objectives 103
Response Spectrum Analysis 104
Response Spectrum 104
Response Spectrum Analysis Procedure 105
Project Description 105
Response Spectrum Input 109
Mode Combination Method 110
Summary 112
Questions 112

Lesson 5:
Random Vibration Analysis According to MIL-STD-810G

Objectives . . . 113
Project Description . . . 114
Distributed Mass . . . 119
Random Vibration Analysis . . . 123
Power Spectral Density Function . . . 126
Overall Level of Acceleration PSD . . . 128
Decibels . . . 129
Random Study Properties . . . 131
Advanced Options . . . 132
RMS Results . . . 132
PSD Results . . . 135
Results . . . 136
Summary . . . 138
References . . . 138
Questions . . . 139
Exercise 7: Random Vibration Analysis of an Electronics Enclosure . . . 140
Exercise 8: Circuit Board Fatigue Estimates . . . 148
Exercise 9: Random Vibration Analysis of a Starter Motor . . . 153

Lesson 6:
Random Vibration Fatigue

Objectives . . . 159
Project Description . . . 160
Random Vibration Fatigue . . . 161
Material Properties, S-N Curve . . . 161
Random Vibration Fatigue Options . . . 164
Summary . . . 166
Exercise 10: Random Vibration Fatigue of a Cantilever Beam . . . 167

Lesson 7:
Nonlinear Dynamic Analysis of an Electronic Enclosure

Objectives . . . 173
Project Description . . . 174
Linear Dynamic Analysis . . . 174
Nonlinear Dynamic Analysis . . . 176
Linear vs. Nonlinear Dynamic Analysis . . . 176
Rayleigh Damping . . . 178
Time Integration Methods . . . 179
Modified Central Difference . . . 179
Newmark and Wilson Methods . . . 179
Iterative Methods . . . 180
Discussion . . . 181
Summary . . . 182
Questions . . . 182
