© 1995-2020, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes SE company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Introduction

About This Course	2
Prerequisites	2
Course Design Philosophy	2
Course Length	2
Using this Book	2
Laboratory Exercises	2
About the Training Files	3
Windows	3
User Interface Appearance	3
Conventions Used in this Book	3
Use of Color	4
What is SOLIDWORKS Simulation?	4
Premium: Nonlinear	5
More SOLIDWORKS Training Resources	5
Local User Groups	5

Introduction to Nonlinear Structural Analysis

Introduction	8
Types of Nonlinearities	9
Geometric Nonlinearities	10
Material Nonlinearities	11
Solving Nonlinear Problems	12

Geometric Nonlinear Analysis

Introduction.	14
Small Displacement Analysis	14
Large Displacement Analysis	15
Finite Strain Analysis	16
Large Deflection Analysis.	17
References.	18

Material Models and Constitutive Relations

Introduction.	20
Elastic Models.	20
Linear Elastic Model	20
Nonlinear Elastic Model.	21
Hyper-elastic Models	22
Elasto-Plastic Models	27
Basic Characteristics.	27
Essential Concepts of Elasto-plasticity.	28
Elasto-Plastic Models	31
Super Elastic Nitinol Model	35
Flow Rule	37
Linear Visco-Elastic Model	38
Creep Model	41
References.	43

Numerical Procedures for Nonlinear FEA

Overview.	46
Incremental Control Techniques.	46
Force Control Method.	46
Displacement Control Method	47
Arc-length Control Method	47
Iterative Methods	48
Newton-Raphson (NR).	49
Modified Newton-Raphson (MNR)	50
Termination Criteria	51
References.	51

Interaction Analysis

Introduction.	54
Component Interaction/ Gap Conditions	54
Local Interaction/ Gap Conditions	54
Troubleshooting for Gap / Interaction Problems	56
References.	58

Lesson 1:**Large Displacement Analysis**

Objective	59
Case Study: Hose Clamp	60
Problem Statement	60
Stages in the Process.	60
Linear Static Analysis	60
Auxiliary Boundary Conditions	62
Solvers	64
Geometrically Linear Analysis: Limitations.	67
Nonlinear Static Study	67
Time Curves (Load Functions).	69
Fixed Incrementation	69
Large Displacement Option: Nonlinear Analysis.	71
Analysis Failure: Large Load Step	72
Fixed Time Incrementation Disadvantages	74
Autostepping Incrementation	74
Autostepping Parameters and Options	75
Advanced Options: Step/Tolerance Options.	75
Linear Static Study (Large Displacement)	77
Summary	79
Questions	80

Lesson 2:**Incremental Control Techniques**

Objective	83
Incremental Control Techniques	84
Force Control	84
Displacement Control	84
Case Study: Trampoline	85
Project Description	85
Stages in the Process.	85
Linear Analysis	86
Membrane Structures	89
Nonlinear Analysis - Force Control	90
Initial Instability of Thin Flat Membranes	92
Restart Function	95
Analysis Progress Dialog Box	95
Analytical Results for Membranes	96
Nonlinear Analysis - Displacement Control	98
Displacement Control Method: Displacement Restraints.	98
Single Degree of Freedom Control Limitation.	100
Loading Mode in Displacement Control Method.	100
Summary	104
Questions	104

Lesson 3:**Nonlinear Static Buckling Analysis**

Objective	105
Case Study: Cylindrical Shell	106
Problem Statement	106
Stages in the Process	106
Linear Buckling	106
Linear Buckling: Assumptions and Limitations	109
Linear Static Study	110
Nonlinear Symmetrical Buckling	110
Arc Length: Parameters	112
Discussion	116
Symmetrical vs. Asymmetrical Equilibrium, Bifurcation Point	117
Nonlinear Asymmetrical Buckling	117
Summary	121
Questions	121
Exercise 1: Nonlinear Analysis of a Shelf	122
Problem Statement	122
Linear Buckling Analysis	124
Nonlinear Buckling Analysis	125
Discussion	129
Summary	129
Exercise 2: Nonlinear Analysis of Remote Control Button	130
Problem Statement	130
Summary	134

Lesson 4:**Plastic Deformation**

Objective	135
Plastic Deformation	136
Case Study: Paper Clip	136
Problem Statement	136
Stages in the Process	136
Linear Elastic	137
Nonlinear - von Mises	139
Nonlinear - Tresca's	144
Discussion	147
Stress Accuracy (Optional)	147
Mesh Sectioning	150
Summary	151
Questions	151
Exercise 3: Stress Analysis of a Beam Using Nonlinear Elastic Material	152
Problem Statement	152
Summary	155

Exercise 4: Oil Well Pipe Connection	156
Problem Description	156
Materials	158
Loading Conditions	158
Goal	158
Lesson 5:	
Hardening Rules	
Objective	159
Hardening Rules	160
Case Study: Crank Arm	160
Problem Statement	160
Stages in the Process	160
Isotropic Hardening	160
Discussion	164
Kinematic Hardening	164
Discussion	166
Summary	166
Questions	167
Lesson 6:	
Analysis of Elastomers	
Objective	169
Case Study: Rubber Pipe	170
Problem Statement	170
Stages in the Process	170
Two Constant Mooney-Rivlin (1 Material Curve)	171
Coefficient of Determination	175
2 Constant Mooney-Rivlin (2 Material Curves)	176
2 Constant Mooney-Rivlin (3 Material Curves)	178
6 Constant Mooney-Rivlin (3 Material Curves)	180
Summary	182
Questions	182
Exercise 5: Analysis of Seal	183
Problem Description	183
Materials	183
Loading Conditions	183
Modeling Approach	183
Goal	183

Lesson 7:

Nonlinear Interaction Analysis

Objective 185

Case Study: Rubber Tube 186

Problem Statement 186

 Instability in Assemblies 192

 Stabilization 192

 Releasing Prescribed Displacement 192

 Validity and Limitations of Static Analysis 196

Summary 197

Questions 197

Exercise 6: Gear Assembly 198

 Problem Description 198

 Materials 198

 Loading Conditions 198

 Goal 198

Lesson 8:

Metal Forming

Objective 199

Bending 200

Case Study: Sheet Bending 200

Problem Statement 200

 Stages in the Process 201

 Plane Strain 202

 Large Strain Formulation Option 209

 Convergence Problems 210

 Automatic Stepping Problems 210

 Discussion 215

 Small Strain Vs. Large Strain Formulations 217

 Summary 219

Questions 220

Exercise 7: Large Strain Contact Simulation - Flanging 221

 Problem Description 221

 Materials 221

 Loading Conditions 221

 Goal 221
