Waltham, Massachusetts 02451 USA

© 1995-2025, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Contents

Introduction

About This Course	2
Prerequisites	2
Course Design Philosophy	2
Using this Book	2
Laboratory Exercises	3
About the Training Files	3
Windows®	3
Conventions Used in this Book	3
Use of Color	4
Color Schemes	4
More SOLIDWORKS Training Resources	5
Local User Groups	5
What is SOLIDWORKS Simulation?	6

Lesson 1: Vibration of a Pipe

Objectives	7
Problem Description	8
Static Analysis	8
Frequency Analysis	11
Discussion	13
Dynamic Analysis (Slow Force)	13
Linear Dynamic Analysis	13
Discussion	19
Dynamic Analysis (Fast Force)	20
Summary	22
Questions	22
Exercise 1: Vibration of Cantilever Beam	23

Lesson 2:**Transient Shock Analysis According to MILS-STD-810H**

Objectives	29
Problem Description	30
Run Frequency	34
Mass Participation Factor	35
Mass Participation in Shells	37
Frequency Discussion	39
Damping	40
Viscous Damping	41
Time Step	45
Summary	55
Questions	55
Exercise 2: Remote Mass Electronics Enclosure	56
Summary	61
Exercise 3: Transient Analysis of Alternator Bracket	62
Maximum Number of Time Increments	69
Summary	71
Exercise 4: Half-Sine Pulse	72
Summary	77

Lesson 3:**Harmonic Analysis of a Bracket**

Objectives	79
Project Description	80
Harmonic Analysis Basics	80
Single DOF Oscillator	81
Harmonic Analysis of a Bracket	82
Phase Angle	83
Harmonic Study Properties	86
Summary	93
Questions	93
Exercise 5: Refining Frequency Steps	94
Summary	98
Exercise 6: Harmonic Analysis of Alternator Bracket	99
Summary	104
Exercise 7: Phase Angle Effects	105
Predicting Results	108
Summary	110

Lesson 4:**Response Spectrum Analysis**

Objectives	111
Response Spectrum Analysis	112
Response Spectrum.	112
Response Spectrum Analysis Procedure.	113
Project Description	113
Response Spectrum Input	117
Mode Combination Method	118
Summary.	120
Questions	120
Exercise 8: Response Spectrum Analysis with Remote Mass	121

Lesson 5:**Random Vibration Analysis According to MIL-STD-810G**

Objectives	129
Project Description	130
Distributed Mass.	134
Random Vibration Analysis	139
Power Spectral Density Function	141
Overall Level of Acceleration PSD	144
Decibels	145
Random Study Properties	147
Advanced Options.	148
RMS Results	148
PSD Results	151
Results.	152
Summary.	154
References.	154
Questions	155
Exercise 9: Random Vibration Analysis of an Electronics Enclosure	156
Exercise 10: Circuit Board Fatigue Estimates	165
Exercise 11: Random Vibration Analysis of a Starter Motor.	170

Lesson 6:**Random Vibration Fatigue**

Objectives	177
Project Description	178
Random Vibration Fatigue	179
Material Properties, S-N Curve	179
Random Vibration Fatigue Options	182
Summary.	184
Exercise 12: Random Vibration Fatigue of a Cantilever Beam	185

Lesson 7:**Nonlinear Dynamic Analysis of an Electronic Enclosure**

Objectives	191
Project Description	192
Linear Dynamic Analysis	192
Nonlinear Dynamic Analysis	194
Linear vs. Nonlinear Dynamic Analysis	194
Rayleigh Damping	195
Time Integration Methods	197
Modified Central Difference	197
Newmark and Wilson Methods	198
Iterative Methods	198
Discussion	200
Summary	201
Questions	201
